

A vibrant, abstract collage of geometric shapes and icons representing various fields of study and human capabilities. The collage features a hexagonal grid pattern with icons for science (microscope, atom, lightbulb), medicine (heart, crutches, wheelchair), education (book, magnifying glass, person at desk), and general knowledge (compass, calculator, bar chart). The color palette is dominated by teal, orange, and grey.

Please join us as we feature platform talks and posters from rehabilitation based students, residents, faculty, staff and our keynote speaker
Dr. Kathleen Martin Ginis
at our 8th annual GF Strong Rehabilitation Research Day !
Dr. Lara Boyd will present at a special lunchtime session.
